HERO — HEADLINE

Banking technology that works the way banks actually work.

HERO — SUBHEAD

ThoughtsCrest builds core banking implementations, automation, and AI for financial institutions that can’t afford to get it wrong. We pair deep banking-domain expertise with proprietary delivery accelerators — so you ship faster, with full control and audit-ready confidence.

STAT BAND

- **Core Banking Implementations —** 30+
- **Data Migrations —** 15+
- **Consultants —** 80+
- **Business Process Automations —** 10+

TRUSTED BY

Logos: National Bank · ZB Financial Holdings · Awash Bank · Sama Alhayat

PRODUCTS — SECTION INTRO

Purpose-built platforms for the realities of banking — auditing, integration, asset management, and end-to-end process testing.

SERVICES — SECTION INTRO

From core banking delivery to AI and workflow automation, we cover the full lifecycle — and bring accelerators that cut delivery time.

AGENTIC AI — SECTION

Move beyond chatbots. We deploy governed banking agents that execute real workflows — with audit-ready logs, human-in-the-loop controls, and full data sovereignty. Built on a banking-grade agent platform, delivered by a team that understands banking.

CLIENT TESTIMONIALS

To be supplied by client. Placeholder cards in wireframe.

2. Products

2a. AuditOne

HERO — HEADLINE

AuditOne

HERO — SUBHEAD

Purpose-built for auditing banking transactions and static data. AuditOne brings precision and a streamlined workflow to the review of core banking records — so audit teams move faster and catch what matters.

FEATURE TICKER

Cross Application Automation · API Automation · Folders & Scenarios · ZIP Upload · Business Processes · Test Runs

WHAT IT DOES — INTRO

AuditOne brings a structured, repeatable workflow to the end-to-end audit of transaction records and static data — making manual review faster, more consistent, and easier to track

WHAT IT DOES — CARDS

- **Essence Transactions —** Audit core banking transaction records with precision.
- **Customer Data —** Review and validate customer information end-to-end.
- **Account Auditing —** Comprehensive auditing of account-level data.

HOW IT WORKS

- **01 · Scenarios —** Define what to audit — transaction types, customer records, or account data — as repeatable scenarios.
- **02 · Business Processes —** Chain scenarios into a full audit workflow that mirrors how your review actually runs.
- **03 · Test Runs —** Execute audits on demand or on schedule, with results tracked and versioned for review.

PROBLEM IT SOLVES

1. Manual transaction review is slow and error-prone.
2. Static data drifts out of sync and goes unchecked.
3. Account-level auditing lacks consistent, repeatable structure.
4. Audit evidence is hard to assemble after the fact.
5. Reviews don’t scale across applications and systems.
6. Findings are inconsistent between auditors and audit cycles.

CTA: *See it in your environment → Book a Demo*

2b. FinLink

HERO — HEADLINE

FinLink

HERO — SUBHEAD

The integration layer that connects your banking ecosystem. FinLink is an enterprise service bus built for financial institutions — orchestrating data and transactions across core banking, channels, and third-party systems through a single, governed interface.

WHAT IT DOES — CARDS

- **System Integration —** Connect core banking, payments, and third-party services without point-to-point sprawl.
- **API Orchestration —** Expose and manage banking APIs with versioning, security, and monitoring built in.
- **Reliable Messaging —** Guaranteed, auditable message delivery across critical banking flows.

PROBLEM IT SOLVES

7. Brittle point-to-point integrations that break with every change.
8. No single view of data moving between banking systems.
9. Hard-to-audit transaction flows across applications.
10. Slow onboarding of new channels or partners.
11. Inconsistent error handling and retries.
12. Vendor lock-in at the integration layer.

CTA: *See it in your environment → Book a Demo*

2c. TestNova

HERO — HEADLINE

TestNova

HERO — SUBHEAD

Banking automation that actually works like a bank. TestNova is an end-to-end automation platform built for the integrated complexity of modern banking. It validates entire business processes — not just code — so you deploy with confidence, speed, and full audit-ready evidence.

WHAT IT DOES — CARDS

- **Business Process Testing —** Validates integrated business processes end-to-end, catching integration failures before production — not isolated scripts.
- **Time-Aware Verification —** Dynamic business-date handling and full EOD-cycle simulation, so interest, penalties, and multi-day workflows are tested as they really behave.
- **Cross-System Orchestration —** Runs across all connected applications simultaneously, validating dependencies a single-system tool can't see.

HOW IT WORKS

- **01 · Scenarios —** A Python script paired with an Excel data sheet. Each row is one unique execution — the atomic unit of testing.
- **02 · Business Processes —** A sequence of scenarios chained together to mirror a real banking workflow, such as full loan origination.
- **03 · Test Runs —** Scheduled execution of a business process with a chosen data set — versioned, tracked, and fully automated.

PROBLEM IT SOLVES — SIX PITFALLS

13. **Static data failure —** Dynamic, date-sensitive data replaces fixed inputs that break as time moves.
14. **Missing processes —** True end-to-end testing catches integration failures isolated scripts miss.
15. **Slow manual validation —** Automated verification (TRVS) and built-in reporting eliminate repetitive human checking.
16. **Multi-day hardship —** Time-aware testing with EOD simulation handles temporal workflows no static tool can replicate.
17. **System complexity —** Cross-system orchestration validates dependencies across all connected applications at once.
18. **Inflexible re-running —** Easy scheduling and automatic re-runs with updated data sets keep the testing lifecycle adaptable.

OPTIONAL PULL-QUOTE

> *"TestNova doesn't just tell you the process ran — it tells you the process worked."*

CTA: *See it in your environment → Book a Demo*

2d. Asset360

HERO — HEADLINE

Asset360 — Fixed Asset Management System

HERO — SUBHEAD

A complete solution to manage the entire lifecycle of fixed assets — from acquisition through disposal. Built to improve accuracy, control, and transparency across your organization.

FEATURE TICKER

Full Lifecycle Coverage · 5-Book Depreciation · Audit-Ready Reports · Compliance-First Design

WHAT IT DOES — INTRO (STRUCTURED ASSET ORGANIZATION)

Asset360 organizes assets through structured categorization. Categories support multiple sub-categories and configurable attributes — serial numbers, location, technical specifications, and maintenance information.

Asset categories: Land & Property · Plant & Machinery · Furniture & Fixtures · Vehicles & Transportation · IT Assets · Intangible Assets

DEPRECIATION MANAGEMENT

Asset360 includes a robust depreciation engine with flexible scheduling, automatic journal entries, and support for 5 accounting books (Financial, Tax, IFRS, and more).

- **SLM —** Straight Line Method
- **WDV —** Written Down Value
- **DDB —** Double Declining Balance
- **UOP —** Units of Production

HOW IT WORKS — END-TO-END ASSET TRACEABILITY

Asset360 supports the complete lifecycle of an asset, ensuring traceability, audit history, and financial accuracy at every stage.

- **01 · Acquisition & Registration —** Record new assets in the system.
- **02 · Configuration —** Set attributes and depreciation rules.
- **03 · Depreciation Processing —** Run periodic depreciation calculations.
- **04 · Suspension or Adjustment —** Adjust depreciation if required.
- **05 · Disposal or Sale —** Remove assets and account for profit/loss.

KEY BENEFITS — WHY ORGANIZATIONS CHOOSE ASSET360

- **Centralized Records —** Maintain all asset data in one unified system.
- **Asset Tracking —** Monitor asset usage and location efficiently.
- **Accurate Depreciation —** Automated calculations across multiple accounting methods.
- **Disposal Accounting —** Manage asset disposal and profit/loss accounting.
- **Financial Compliance —** Audit-ready reports aligned with accounting standards.

- **5-Book Support —** Financial, Tax, and IFRS books managed in parallel.

CLOSING STATEMENT

Asset360 helps organizations maintain better financial control and operational visibility over fixed assets — from acquisition to disposal.

3. Services

The five service pages (AI & ML, Core Banking, Custom Software Development, Data Migration, Workflow Automation) share one layout. Each page has its own hero copy, followed by blocks that are common to all five.

3.1 Page-Specific Hero Copy

AI & ML SERVICES

We design, build, and deploy machine-learning and AI systems for banking — from fraud and risk models to document intelligence and agentic workflows — engineered for accuracy, explainability, and regulatory scrutiny.

CORE BANKING

We implement and modernize core banking platforms end-to-end. With 30+ implementations behind us, we de-risk the most critical project a bank ever runs.

CUSTOM SOFTWARE DEVELOPMENT

Banking-grade custom software, built to your requirements and your compliance environment. Secure by design, delivered predictably, owned by you.

DATA MIGRATION

Move data between core systems with accuracy and confidence. Our Migration Factory Accelerator reduces risk and timeline on the migrations that keep teams up at night.

WORKFLOW AUTOMATION

Automate the manual, multi-system processes that slow banking operations down — with the controls, evidence, and reliability banking demands.

3.2 Shared Blocks (identical across all five Service pages)

What we deliver

> **Note to build team:** *Six cards per page. The six deliverables differ by service and are still pending from the client. Once supplied, card copy can be added here.*

Engagement Models

- **Fixed-Price Delivery —** Defined scope, fixed cost, predictable outcome.
- **T&M / Staff Augmentation —** Skilled banking specialists embedded in your team.
- **Managed Services —** We run it, you focus on the business.
- **Outcome-Based —** Engagements priced and measured against the results that matter to you.

Speed Up Your Process Using Our Tools

- **01 · TCL Build Configurator —** Configure builds faster with a repeatable, proven setup.

- **02 · TCL Test Automate —** Automated testing that accelerates QA without cutting corners.
- **03 · Customization Factory —** A structured approach to delivering customizations at scale.
- **04 · Migration Factory Accelerator —** De-risk and speed up data migration projects.
- **05 · FinLink ESB —** Connect systems through our enterprise service bus.

Why choose ThoughtsCrest

- Banking-First Expertise
- Predictable Delivery
- Security & Compliance
- Onsite–Offshore Model

Frequently Asked Questions

ThoughtsCrest — About Us Page Content
Section 1 — Hero: "About us"
Heading: About us
Subheading (replaces the lorem ipsum): We're a global technology partner for banks and financial institutions — helping them modernize core systems, automate operations, and adopt AI with confidence. For over a decade, we've turned complex banking transformation into faster go-lives, lower risk, and measurable results.
Button: Join Us

Section 2 — "What is ThoughtsCrest?" (left text / right image)
ThoughtsCrest Software is a global technology partner for banks and financial institutions, enabling them to drive innovation and efficiency through cutting-edge solutions.
As an official Finastra partner, we have deep expertise in Fusion Essence core banking implementation, customization, training, and support. Our team of 80+ highly skilled consultants has successfully executed 70+ projects for leading banks worldwide.
Founded in 2015 by a group of banking consultants, we began by building custom software for financial institutions and have since grown into a full-spectrum core banking implementation and digital transformation firm. Today our work spans core banking, workflow automation, data migration, and AI — backed by proprietary accelerators that compress delivery timelines and reduce implementation risk.
(Image placeholder on the right — suggest a product/team or core-banking dashboard visual.)

Section 3 — "Our Team"
Heading: Our Team
Intro line (above the team grid): Behind every successful go-live is a team that knows banking inside out. Our consultants combine deep core banking domain knowledge with modern

engineering — so transformation is delivered by people who understand both the technology and the business it serves.
(4 team-member cards below — add names, roles, and photos. Suggested role labels: Leadership, Core Banking Practice, Automation & AI, Delivery & Quality.)

Section 4 — Stats band (dark banner)
Use your real figures, matched to the wireframe's four-stat layout:

2015	100+	70+	10+
Year Founded	Consultants	Projects Delivered	Business Process Automations

Note: your wireframe placeholder showed "100+ Employees" and "80+ Consultants." Your current live site states 80+ consultants and 70+ projects. I'd recommend aligning to the live, verifiable numbers above to avoid inconsistency across pages. If you do have 100+ total employees, you could use: 2015 · 100+ Employees · 80+ Consultants · 70+ Projects.

Section 5 — "Our Core Strengths" (4 columns)
Your current-site copy, used as-is and completed where the screenshot was cut off:
Core Banking Expertise Official Finastra partner with deep expertise in Fusion Essence implementation, customization, data migration, training, and support.
Proprietary Accelerators Tools like TCL Build Configurator and TestNova reduce CBS setup and testing time by over 70% — accelerating delivery without compromising quality.
Automation & AI Proven capabilities in workflow automation (Newgen One, iBPS, OmniDocs) and AI-driven banking solutions that streamline operations end to end.
Data & Analytics Building modern data lakes and data warehouses to power advanced insights and smarter, faster decision-making.

Section 6 — "Client Testimonials"
Heading: Client Testimonials
Intro line: Trusted by banks and financial institutions to deliver transformation that lasts. Here's what our clients say about working with ThoughtsCrest.
(4 testimonial cards — add client quote, name, title, and institution. Keep quotes short and outcome-focused: time-to-go-live, risk reduction, efficiency gains.)

Section 7 — Footer
Tagline (under logo): ThoughtsCrest Software — global technology partner for banks and financial institutions. Core banking, automation, and AI.
Connect with us: *(social icons — LinkedIn, etc.)*
Visit us: *(office address — Koramangala, Bengaluru, Karnataka, India)*

Here's complete content for the Careers page, mapped section-by-section to your wireframe.

ThoughtsCrest — Careers Page Content
Section 1 — Hero
Heading: Build Banking That Works
Sub-line (add below the heading to give it weight): Join a team that turns complex banking transformation into real, working systems for institutions worldwide. We build the technology banks run on — and we're looking for people who want to build it with us.
Button: Join Us

Section 2 — "Who Thrives Here?" (4-step connected row)
Keep your existing four labels — they're sharp and on-brand. Lightly polished, with a one-line expansion under each:
Builders who ship. People who turn ideas into working software and take pride in getting it live.
Owners who communicate clearly and keep promises. People who say what they'll do, do what they said, and keep everyone in the loop.
Curious minds who improve the system, not just the task. People who ask why, spot the better way, and leave things stronger than they found them.
Teammates who are respectful, direct, and coachable. People who give honest feedback, take it well, and grow with the team.

Section 3 — "What makes ThoughtsCrest a great place to work at?" (carousel cards)
Six cards for the carousel (it shows 3 at a time with 2 dots). Each has a title + short blurb:
Real banking, real impact Your work goes live at banks and financial institutions around the world — not into a backlog. You'll see the systems you build run in production.
Learn from the best in core banking Work alongside 80+ consultants with deep Finastra Fusion Essence and Newgen expertise. Domain knowledge here is caught, not just taught.
Build with modern tools and AI From proprietary accelerators like TCL Build Configurator and TestNova to automation and agentic AI, you'll work at the front edge of banking technology.
Ownership from day one We're a team where individuals carry real responsibility. Good ideas win regardless of who they come from, and you'll own outcomes, not just tickets.
Grow your career, not just your role Clear paths across core banking, automation, AI, and data — with the mentorship and project exposure to move fast.
A culture that backs you Direct, respectful, and supportive. We move quickly without burning people out, and we celebrate the wins together.

Section 4 — "What Benefits are waiting for you?" (2×3 grid)
Six benefit cards. Titles plus a line each — adjust to match your actual policy:
Competitive Compensation Pay that reflects your skills and the value you bring, reviewed as you grow.
Health & Wellness Medical coverage and wellness support for you and your family.
Learning & Certifications Sponsored training and certifications in Finastra, Newgen, AI, and more — we invest in your expertise.
Global Project Exposure Work on transformation programs for leading banks across multiple markets and geographies.
Flexible & Hybrid Working A balanced onsite-offshore and hybrid model that respects how good work actually gets done.
Strong Team Culture Collaborative, low-ego, and genuinely supportive — with the people and the wins to match.

Section 5 — "Why choose ThoughtsCrest" (4 pill tags)
Keep your four pills; here's a one-line definition for each (use as tooltip, hover, or supporting copy):
🏛 **Banking-First Expertise** — A decade of deep specialization in core banking. We speak banking, not just software.
📊 **Predictable Delivery** — Proprietary accelerators and proven methodology mean faster go-lives with lower risk.
🛡 **Security & Compliance** — Built for the standards regulated financial institutions are held to.

👥 **Onsite-Offshore Model** — The right mix of proximity and scale to deliver efficiently, wherever clients are.
Closing line (above the button): Ready to build banking that works? We'd love to meet you.
