Agentic AI Page:

Customer Service & Support Automation

|AI agents assist service teams by understanding customer queries, retrieving relevant information, preparing responses, and reducing turnaround time.

Operations & Back-Office Automation

Agents support document verification, case processing, exception handling, compliance checks, and internal approvals — reducing manual effort across back-office teams.

Knowledge Assistant for Bank Staff

AI agents help employees instantly access product information, SOPs, policy documents, process manuals, and regulatory guidelines — right when they need them.

Core Banking & Application Support

Using our core banking background, we design agents to support L1/L2 application support, issue triage, ticket analysis, root-cause assistance, and operational reporting.

Sales & Relationship Management Support

Agents assist relationship teams with customer insights, product suggestions, document preparation, and follow-up tracking — enabling more meaningful client engagement.

Core Banking Page:

Greenfield Core Implementations

Target operating model, product setup, parameterization, interfaces, and go-live cutover.

Upgrades & Forward Ports

Zero-surprise upgrades with impact analysis, retrofitting and regression safety nets.

Data Migration

Extract–Transform–Load (ETL), reconciliation, mock runs, data quality remediation, and regulatory-grade audit trails.

Customizations & Integrations

Lending, deposits, payments, treasury, trade, Islamic banking (IPD), cards, AML/KYC, regulatory reporting, digital channels etc.

Quality Engineering & UAT Support

Test strategy, automated regression packs, performance testing, and business-led UAT orchestration.

Post Go-Live Hypercare & Managed Services

Stabilization, incident SLAs, continual optimization, and knowledge transition.

Workflow Automation Page:

Process Re-engineering & BPM

Map current state, redesign on Intelligent Process Automation Platform with SLA timers, escalations, exception queues, and audit trails.

Content & Records

Centralized document lifecycle on NewgenONE ECM with retention, legal holds, and granular access controls.

Intelligent Capture

Branch/central scan flows, barcode/QR, OCR/ICR, classification, validation, maker–checker, and quality gates.

Business Rules & No-Code Apps

Configurable forms, checklists, dynamic routing, and versioned rule packs for rapid change.

Systems Integration

Ready connectors/REST for core banking, LOS/LMS, CRM, AML/KYC, payments, SMS/email, and e-signature.

Observability & Compliance

Operational dashboards, KPI boards (TAT, WIP, aging), e-discovery, and regulator-ready audit logs.
